Cybersecurity / Ethical Hacking

Entry barrier overcome kore Job-Ready howar Complete Roadmap

AI juger jonno updated guideline — ki shikhte hobe, kon order e, kivabe proof dekhabe, ar kivabe prothom job/client pabe.

> **Ei guide ta kar jonno:** Ekdom **absolute zero** theke — computer on korte o jano na — shei manush theke shuru kore job-ready howa porjonto. Already computer/IT jano? Phase 0 skip kore Phase 1 theke shuru koro. Realistic timeline zero theke: **18–24 mash** consistent practice (din e 2–3 ghonta) dhore. Computer already chalate parle: 12–18 mash.

Section	Ki ache
1. Bastobota	Entry-level keno kothin, AI ki replace korche, ki korche na
2. Roadmap overview	6 ta phase (Phase 0–5), timeline, output
3. Phase 0–5 detail	Computer on kora theke shuru — protiti phase e ki shikhba, resource, milestone
4. Certification strategy	Kon cert, kon order e, keno
5. Portfolio & proof	HR filter pass korar jinish
6. AI skill layer	AI diye kaj + AI/LLM security
7. Web/WordPress path	Web dev skill thakle (ba shikhle) shortcut
8. Job hunting	Bangladesh theke remote/local/freelance
9. Weekly routine	Sample study schedule
10. Bhul gula	Ja korle shomoy nosto hoy
11. Legal & ethics	Must-know rules
Part 2: Advanced Remote	**International remote e mid/senior job — page 13 theke**
12–13. Bastobota + Phase 6–8	Senior remote e ki dekhe, Mash 24–60 roadmap
14–16. Tracks, core skill, cert	6 ta advanced lane, OSWE/OSEP/AWS/CKS map
17–18. Remote skill + job hunt	English, setup, payment, experience ladder
19–20. Interview + checklist	Senior interview, negotiation, final checklist

1. Bastobota: 2026 e entry-level keno kothin

Demand ache, kintu "junior" seat kom ar applicant onek beshi. Ekta junior role e hazar hazar application porche. Tai certificate thakai jothesto na — **proof of skill** lagbe.

AI ki replace korche

- Basic vulnerability scanning, tool chalano, scripted exploit — eta mostly automated.
- Tier-1 SOC alert triage er ekta boro ongsho AI-assisted hoye geche.
- Generic report writing — AI draft kore fele.

AI ki replace korte parche na

- Business logic flaw khuja (e.g. checkout e price manipulate, IDOR, access control bypass).
- Context bujhe risk decide kora — kon bug ta client er jonno asholei critical.
- Multiple chhoto bug chain kore boro impact banano.
- AI system nijei test kora (prompt injection, agent abuse) — eta notun ar fast-growing field.
- Client er sathe communicate, scope set kora, fix explain kora.

> **Mul kotha:** Tool operator hoyo na, **thinker** hou. Fundamentals + manual testing + AI fluency — ei tin ta combination thakle entry barrier onek kome jay.

Kon entry role gula realistic

Role	Kaj	Kar jonno bhalo
SOC Analyst (L1)	Alert monitor, triage, escalate	Job chai druto, stable salary
Junior Pentester	Web/network test, report	Offensive side e interest
Application Security (AppSec)	Code review, secure dev, SAST/DAST	**Developer background thakle best**
Vulnerability Researcher / Bug Hunter	Bug khuje report, bounty	Freelance/independent mindset
Security-focused Web Dev	Secure build + audit service	Existing client base thakle

2. Roadmap Overview

Phase	Shomoy	Focus	Shesh e output
0. Computer Literacy	Mash 1–3	PC chalano, typing, Windows, internet, safety, technical English, IT basics	Confidently PC chalao, 30+ WPM typing, IT basics clear
1. Foundation	Mash 4–7	Networking, Linux, web basics, Python	TryHackMe beginner path complete, notes
2. Core Offensive	Mash 8–11	Web app hacking, recon, network pentest basics	PortSwigger labs 100+, 20+ machine
3. First Cert + Proof	Mash 11–13	eJPT/PNPT prep, writeups	1 practical cert, blog/GitHub e writeup
4. Specialize + Real Bugs	Mash 13–18	AppSec/WordPress/cloud/AI security	Real CVE/bounty/disclosure
5. Job Hunt + Advanced	Mash 16–24	Apply, network, OSCP (optional)	Job/client/contract

Mash er hishab zero theke. Computer already jano hole protiti phase theke 3 mash bad dao.

> **Rule:** Protiti phase e **output** thakbe — notes, writeup, report, GitHub repo. Shudhu video dekhe "shikhechi" bola chalbe na. Je jinish dekhano jay na, HR er kache seta exist kore na.

3. Phase-by-phase detail

Phase 0 — Computer Literacy: Ekdom Zero theke (Mash 1–3)

Ei phase ke halka bhabo na. Hacker hote hole age computer ke **nijer haat er moto** chalate parte hobe. Ekhane jei confidence ashbe, pore protiti phase druto hobe.

0.1 — Ki kinba / ki lagbe

Jinish	Minimum	Recommended (pore lab er jonno)
Laptop/Desktop	Jekono chalu PC diye shuru kora jay	RAM 16 GB, SSD 512 GB, Intel i5/Ryzen 5 ba upore — virtual machine chalate lagbe
Internet	Stable broadband/mobile data	Broadband — video course ar lab download e onek data lage
Onnanno	Notebook-kolom (notes er jonno)	Headphone (course video), pore ekta second monitor

Taka kom thakle 8 GB RAM diye Phase 0–1 korte parba; Phase 1 er shesh e (lab banano) RAM baraleo cholbe.

0.2 — Computer chalano (Week 1–3)

Topic	Ki shikhba
Hardware chena	CPU, RAM, storage (HDD/SSD), monitor, keyboard, mouse, port (USB, HDMI, LAN), charger — ke ki kaj kore
On/Off & basic	Power on, login, **Shut down / Restart / Sleep** er parthokko, hang hole ki korba
Mouse	Left click, right click, double click, drag & drop, scroll, select
Keyboard	Shob key chena, Shift/Ctrl/Alt/Enter/Backspace/Delete/Tab/Esc er kaj, Bangla-English switch
Typing	Proti din 20–30 minute typing practice. Target: Phase 0 shesh e **30+ WPM**, Phase 1 shesh e 40+ WPM

Practice: keybr.com ba typing.com (free typing practice). GCFGlobal (free "Computer Basics" course). YouTube e "computer basics bangla" likhe search korleo onek Bangla tutorial pabe.

0.3 — Windows Operating System (Week 3–6)

Topic	Ki shikhba
Desktop & Taskbar	Start menu, app khola/bondho, window minimize/maximize, multiple window er moddhe switch (Alt+Tab)
File & Folder	File Explorer, folder banano, copy/cut/paste, rename, delete, Recycle Bin, file extension (.pdf, .exe, .zip, .txt) — extension show kora on rakhbe
Software	Software install/uninstall kora, kothay theke download korbe (official site only), update
Settings	Wi-Fi, display, user account, Windows Update, storage check
Shortcuts	Ctrl+C/V/X/Z/A/S/F, Win+E, Win+D, Ctrl+Shift+Esc (Task Manager)
Troubleshooting	Task Manager e kon app RAM/CPU khacche, hang app bondho kora, restart, basic problem Google kore solve
Zip & tools	ZIP/RAR extract, PDF reader, text editor (Notepad, pore VS Code)

0.4 — Internet, Email & Online Safety (Week 5–8)

Topic	Ki shikhba
Browser	Chrome/Firefox, tab, bookmark, download folder, history, incognito, extension ki
Search skill	Google e thik vabe search: English keyword, "quotes" diye exact phrase, error message copy kore search. **Ei skill hacker der #1 skill**
Email	Gmail account, email pathano/reply/attachment, spam folder chena
Cloud	Google Drive e file upload/share
Nijer safety	Strong password, password manager (Bitwarden — free), 2FA on kora, phishing/fake link chena, fake software theke bacha
Bangladesh context	Online scam, fake job offer, bKash/Nagad OTP scam — eigulo kivabe hoy bujha (eta-o security!)

0.5 — Technical English & Shekhar Skill (pura Phase 0 dhore cholbe)

- Cybersecurity er 95% resource English e. Daily 20–30 minute English technical article/video (subtitle on rekhe).
- Ekta notun word pele note koro — protiti din 5 ta technical word.

- AI (ChatGPT/Claude) ke tutor hisebe use: "eta Banglay shohoj kore bujhao" — kintu nijer haate practice korbe.
- Note nite shikho: ekta notebook/Notion page e protiti din ki shikhecho 3 line likho.
- Problem e atke gele age 20 minute nije Google kore try, tarpor prosno — **self-solve kora** shobcheye boro skill.

0.6 — IT Fundamentals ar Basic Math (Week 8–12)

Topic	Ki shikhba
Computer kivabe kaj kore	Input → process → output, OS ki, app ki, file system ki, memory vs storage
Network basic idea	Internet ki, router/modem, IP address er idea, Wi-Fi vs LAN, website kivabe load hoy (shudhu concept)
Number system	Binary (0/1), decimal, hexadecimal — conversion. Networking (subnetting) e lagbe
Logic	AND/OR/NOT, if-then chinta — programming er bhit
Command line intro	Windows e CMD/PowerShell khola, cd, dir, mkdir, ipconfig, ping — terminal ke bhoy na pawa
Virtual machine idea	VirtualBox install kore ekta Linux (Ubuntu) chalano — Phase 1 er prostuti

Resources: Professor Messer (free CompTIA A+ / IT fundamentals videos), CS50 (Harvard, free) er prothom kichu lecture, TryHackMe "Pre-Security" path er shuru (beginner-friendly, browser ei chole).

Phase 0 shesh howar test — nicher shob gula parle Phase 1 e jao:
☐ Kono help chara PC on/off, software install, file organize korte paro
☐ 30+ WPM typing
☐ Error message Google kore nije 3–4 ta problem solve korecho
☐ Password manager + 2FA nijer account e on
☐ Binary ↔ decimal convert korte paro
☐ CMD/PowerShell e basic command chalate paro
☐ VirtualBox e Ubuntu install kore chalate parecho
☐ English e ekta beginner tech video bujhte paro (subtitle soho)

Phase 1 — Foundation (Mash 4–7)

Ekhane shortcut nile pore atke jaba. Advanced pentester ra shobai fundamentals e strong. Phase 0 er pore ei phase ta shobcheye kothin lagbe — eta normal, dhoirjo rakho.

Topic	Ki ki jante hobe
Networking	OSI/TCP-IP model, TCP vs UDP, 3-way handshake, IP/subnetting, DNS, DHCP, HTTP/HTTPS, TLS basics, common ports (21, 22, 25, 53, 80, 443, 445, 3306, 3389)
Linux	File system, permissions (chmod/chown, SUID), users/groups, processes, cron, bash scripting, grep/awk/sed, ssh, package management
Windows	Basic AD concept (user, group, domain), PowerShell basics, services, registry idea
Web fundamentals	HTTP request/response, headers, cookies, sessions, CORS, same-origin policy, REST API, JSON, auth (session vs JWT)
Scripting	Programming kokhono na korle: Python diye shuru — variable, if/else, loop, function, list/dict, file. Tarpor requests, sockets, automation. Basic Bash. (Free: Python for Everybody / CS50P)

Topic	Ki ki jante hobe
Tools intro	Nmap, Wireshark, Burp Suite (Community), browser DevTools, curl

Resources: TryHackMe (Pre-Security, Cyber Security 101 path), OverTheWire Bandit (Linux), Professor Messer (free Network+/Security+ video), Python er jonno nijer chhoto automation script.

Milestone: Nijer ghore lab banao (VirtualBox/VMware + Kali Linux + Metasploitable/DVWA). Lab setup er ekta blog post/README likho.

Phase 2 — Core Offensive Skills (Mash 8–11)

Web application security (shobcheye important — job o bounty dutor jonno):

Vulnerability class	Practice
SQL Injection (in-band, blind, time-based)	PortSwigger SQLi labs, manual + sqlmap
XSS (reflected, stored, DOM)	PortSwigger XSS labs, CSP bypass bujha
Broken Access Control / IDOR	Shobcheye common real-world bug — beshi shomoy dao
Authentication flaws	Password reset logic, 2FA bypass, brute-force protection
CSRF, SSRF	PortSwigger labs, cloud metadata SSRF idea
File upload, Path traversal, LFI/RFI	WordPress e khub common
Business logic flaws	AI shobcheye kom pare — tomar edge
API security	OWASP API Top 10, broken object/function level auth

Network / system: Recon (nmap, enumeration), service exploitation, privilege escalation (Linux + Windows), password attacks basics, Active Directory intro (Kerberoasting idea, BloodHound concept).

Resources: PortSwigger Web Security Academy (free, best web resource), TryHackMe Jr Penetration Tester path, HackTheBox Starting Point + Easy machine, OWASP Top 10 + OWASP Testing Guide.

Milestone: 100+ PortSwigger lab, 20–30 THM/HTB machine. Protiti machine er nijer notes rakho (Obsidian/Notion).

Phase 3 — First Practical Cert + Public Proof (Mash 11–13)

- Ekta **hands-on** cert neo (section 4 dekho). Multiple-choice cert er cheye practical exam beshi value dey.
- Retired HTB machine er writeup publish koro (active machine er na — rules violate hoy).
- GitHub e nijer tool/script rakho: recon automation, WordPress plugin scanner helper, report template.
- Ekta professional sample pentest report banao (DVWA ba nijer lab er upor) — Executive summary, findings, severity (CVSS), PoC, remediation. **Report writing skill e onek candidate weak** — eta tomake alada korbe.

Phase 4 — Specialize + Real-world Bugs (Mash 13–18)

Generalist hoye junior market e compete kora kothin. Ekta lane bechhe nao:

Specialization	Keno	Shuru kivabe
Web AppSec / Code review	Dev background e natural fit	Open-source PHP/JS code audit, Semgrep
WordPress security	Huge ecosystem, active bounty program	Section 7 dekho
Cloud security	Demand high, AWS/Azure misconfig	flAWS.cloud, AWS free tier lab
AI / LLM security	Fastest-growing niche	OWASP Top 10 for LLM, prompt injection labs
SOC / Blue team	Stable entry job beshi	Splunk/ELK, Sigma rules, LetsDefend, Blue Team Labs

Milestone: Ontoto **1–3 ta real finding** — bug bounty report (valid/triaged), CVE, ba responsible disclosure. Resume te etai shobcheye shoktishali line.

Phase 5 — Job Hunt + Advanced (Mash 16–24)

- Phase 4 er majhamajhi thekei apply shuru koro — perfect howar jonno wait koro na.
- OSCP — HR filter pass korte shahajjo kore, beshi remote/international job e chaoa hoy. Budget ar shomoy thakle neo.
- Section 8 er job hunting strategy follow koro.

4. Certification Strategy

Cert er kaj duita: (1) skill shikhte structure dey, (2) HR filter pass korate shahajjo kore. Kintu cert = job na. Cert + portfolio + real finding = job.

Cert	Type	Level	Kokhon nibe
CompTIA Security+	Multiple-choice, theory	Beginner	Corporate/govt/SOC job target korle. Pentest er jonno optional
eJPT (INE)	Fully practical	Beginner	**Prothom hands-on cert hisebe best**. Phase 3 e
PNPT (TCM Security)	Practical + report + debrief	Intermediate	eJPT er pore, realistic engagement experience
OSCP (OffSec)	Practical, kothin	Intermediate +	HR filter er "gold standard". Phase 5 e
BSCP (PortSwigger)	Practical web	Intermediate	Web/AppSec lane bechhe nile
CEH	Mostly theory	Beginner	Kichu compliance/govt job e chay; skill proof hisebe weak

> **Recommended path (budget-conscious):** Free resource diye Phase 1–2 → **eJPT** → real bugs/portfolio → (job target onujayi) **PNPT** ba **OSCP**. eJPT er exam price 2026 e $249 (INE). Onno cert er dam change hoy — kenar age official site e check koro.

Bangladesh theke tips: International card (dual-currency) lagbe payment er jonno. Sale (Black Friday, Cyber Monday) e onek cert/platform e boro discount dey — tokhon kino.

5. Portfolio & Proof — HR filter pass korar jinish

5,000 applicant er majhe tumi alada hobe **dekhano jay emon kaj** diye:

Proof	Kivabe banabe	Impact
Real CVE / bounty Hall of Fame	Bug bounty / responsible disclosure	Shobcheye high
Technical blog (writeups)	Retired HTB, PortSwigger lab explanation, nijer research	High
GitHub tools	Recon/automation script, Semgrep rule, scanner	High (dev der jonno easy)
Sample pentest report	Nijer lab er upor full professional report	Medium-High
THM/HTB rank & badges	Consistent practice	Medium
CTF participation	CTFtime e event, team join	Medium
LinkedIn presence	Weekly learning post, writeup share	Medium (visibility)

Resume structure: Summary (2 line) → Skills (grouped) → **Projects & Findings** (CVE/bounty age) → Certs → Experience (dev experience o relevant — secure coding, client sites maintain) → Links (GitHub, blog, HTB).

6. AI Skill Layer — 2026 e must

Duita alada jinish shikhte hobe: **AI diye security kaj** ar **AI system er security**.

A. AI ke tool hisebe use kora

- Recon output, log, code review te AI diye druto pattern dhora — kintu protiti finding **manually verify**.
- Custom script/automation druto likha (Python, Burp extension).
- Report draft — kintu final technical accuracy tomar dayitto.
- Notun vuln class/CVE druto bujhte AI ke tutor hisebe use.

B. AI/LLM Security (notun job lane)

- OWASP Top 10 for LLM Applications porho.
- Prompt injection (direct + indirect), data exfiltration via LLM, insecure tool/agent permissions, RAG poisoning.
- Practice: Gandalf (Lakera), PortSwigger er LLM attack labs, nijer chhoto chatbot banie test koro.
- AI governance basic: NIST AI RMF er idea.
- WordPress e onek AI chatbot/AI content plugin ashche — ei plugin gulo test kora ekta khali niche.

> **Warning:** Shudhu AI tool chalano ke skill dekhio na. Interview e manually explain korte na parle reject. AI tomar speed baraabe, fundamentals replace korbe na.

7. Web / WordPress Path — Optional Shortcut

Zero theke ashle: Phase 2 er shomoy HTML, CSS, JavaScript, PHP basic ar ekta chhoto WordPress site/plugin banano shikhe nile ei path khule jay. Je nije code likhte pare, she **vulnerable code kothay thake** druto bujhe. Already WordPress/PHP dev hole eta 4–6 mash egiye rakhe.

Kon jinish focus korbe

WordPress vuln pattern	Ki check korbe
Missing capability check	current_user_can() chara AJAX/REST action
Missing / weak nonce	wp_verify_nonce / check_ajax_referer nei → CSRF
wp_ajax_nopriv_ handler	Unauthenticated user ki korte pare
REST API permission_callback	__return_true diye sensitive route
SQL Injection	$wpdb->query e prepare() chara user input
XSS	esc_html/esc_attr/wp_kses chara output
File upload / LFI	Extension/MIME check, include() e user input
Privilege escalation	update_option / user meta / role change user input theke
Shortcode / Elementor widget attributes	Contributor-level stored XSS — khub common

Earning path

- **Wordfence Bug Bounty Program** — WordPress plugin/theme vuln report kore bounty. Wordfence bole in-scope vuln e per vulnerability $31,200 porjonto pawa jay (high severity + popular plugin e beshi). Chhoto start o count kore.
- **Patchstack** — WordPress vuln database o researcher program ache; current rules ar reward official site e check koro.
- Shuru koro **kom install er plugin** theke (kom competition), pore popular plugin.
- Semgrep diye nijer WordPress-specific rule likho — eta GitHub portfolio o hoye jay.
- Web dev client thakle (ba pore hole) **"WordPress Security Audit + Hardening"** service add koro — security career er moddhei earning shuru.

> **Unfair advantage:** Developer + security researcher = plugin/software company gulor jonno ideal AppSec hire. Ei combination khub kom manush er ache.

8. Job Hunting Strategy (Bangladesh theke)

Channel	Kivabe	Note
Local companies	Bank, telco, fintech (MFS), software firm, security firm	SOC/AppSec entry beshi; Security+ / local network help kore
International remote	LinkedIn, company career page, security job board	OSCP + public proof beshi lage; time-zone flexibility
Freelance	Upwork, nijer existing client, referral	WordPress security audit, malware cleanup, hardening — druto earning
Bug bounty	Wordfence, Patchstack, HackerOne, Bugcrowd, Intigriti	Income irregular — full-time dependence age na
Community	BD cybersecurity community, CTF team, Discord, LinkedIn	Referral e onek job hoy

Apply korar tactics

- Mass apply na — protiti application e relevant project/finding highlight koro.
- Cold message: hiring manager/security lead ke short message + nijer best writeup/finding link.
- Interview prep: OWASP Top 10 deep explain, ekta machine/bug live walk-through, scenario question ("login page test korbe kivabe?"), nijer report dekhao.
- Take-home test e report quality te shobcheye beshi focus.
- Prothom job e title/salary er cheye **learning ar real exposure** beshi important.

9. Sample Weekly Routine (din e 2–3 ghonta)

Phase 0 er routine

Din	Kaj
Protidin	Typing practice — 20–30 min (keybr/typing.com)
Shonibar–Shombar	Computer/Windows lesson (GCFGlobal/YouTube) + nije haate try — 1.5 h
Mongolbar–Budhbar	Internet, email, safety, search practice — 1.5 h
Brihoshpotibar	IT fundamentals/number system/CMD — 1.5 h
Shukrobar	English tech video + shopta r notes review — 1 h

Phase 1 theke routine

Din	Kaj
Shonibar	Notun theory/concept (course module) — 2–3 h
Robibar	Practice lab (PortSwigger/THM) — 2 h
Shombar	Practice lab + notes update — 2 h
Mongolbar	Scripting/tool building — 2 h
Budhbar	HTB/THM machine — 2–3 h
Brihoshpotibar	Bug hunting / WordPress plugin code review — 2–3 h
Shukrobar	Writeup/blog/LinkedIn post + weekly review — 1–2 h

Consistency > intensity. Proti din 2 ghonta x 12 mash, weekend e 12 ghonta x 3 mash er cheye onek beshi kaje dey. Din er ekta fixed shomoy (jemon raat 9–11) shudhu study er jonno block koro.

10. Common Bhul — avoid koro

Bhul	Keno problem	Ki korbe
Tutorial hell	Shudhu video dekha, hands-on nai	Proti 1 ghonta video = 2 ghonta practice
Fundamentals skip	Pore advanced e atke jaba	Phase 0–1 shesh koro, rush koro na
Tool-dependent	AI/scanner ei kaj kore felche	Manual testing, tool ki kore bujho
Cert collector	Proof chara cert value kom	1–2 practical cert + portfolio
Notes na rakha	Ek mash por shob bhule jaba	Obsidian/Notion e structured notes
Shob kichu ekshathe	Kono kichutei depth hoy na	Ekta lane e specialize
Perfection er jonno wait	Apply/publish deri	70% ready holei apply/publish
Scope er baire test	Legal risk, ban	Section 11 follow koro

11. Legal & Ethics — Must-know

Golden rule: Permission chara kono system e test kora **illegal**. Bangladesh e o cyber law ache, international o. Ekbar record kharap hole security career shesh.

- Shudhu nijer lab, practice platform (THM/HTB/PortSwigger), ba **written authorization** ache emon target e test.
- Bug bounty te program er **scope ar rules** line-by-line porho. Out-of-scope = no reward + ban hote pare.
- Client site test korle written scope + permission (email/contract) rakho.
- Vuln pele responsible disclosure — public e post na kore vendor/program ke report, fix er pore publish.
- Data access hole minimum proof niye thamo — real user data download/share na.
- DoS/destructive test kokhonoi na jodi explicitly allowed na thake.

Final Job-Ready Checklist

#	Item	Done?
0	Computer, Windows, typing (40+ WPM), internet safety — Phase 0 test pass	☐
1	Networking + Linux + web fundamentals confidently explain korte paro	☐
2	OWASP Top 10 protiti ta exploit + fix explain korte paro	☐
3	100+ PortSwigger lab, 30+ THM/HTB machine	☐
4	1 ta practical cert (eJPT/PNPT/OSCP)	☐
5	5+ public writeup (blog/GitHub)	☐
6	1+ real finding (bounty/CVE/disclosure)	☐
7	1 ta professional sample pentest report	☐
8	GitHub e 2–3 ta security tool/script	☐
9	AI/LLM security basics (prompt injection etc.) jano	☐
10	Updated resume + LinkedIn + portfolio link	☐

Sources: Wordfence Bug Bounty / Intelligence reports (2026); HackerDNA eJPT 2026 guide; StationX pentest certifications 2026; Dice, ClearanceJobs, ISC2-cited workforce data (2026). Price/reward change hote pare — official site e verify koro.

Advanced level e international remote job chao? Ei checklist shesh hole Part 2 — Advanced Remote Track (Section 12–20, page 13 theke) follow koro.

Part 2 — Advanced Remote Track

International remote e advanced-level (mid/senior) job paoar jonno Part 1 er por ar ki ki shikhte hobe

Part 1 (Section 1–11) tomake junior level e job-ready banay. Ei part ta tar **upore** — Bangladesh er local job na, sorasori international remote company/client er jonno advanced level e pouchanor plan.

> **Age eta bujho:** “Advanced” mane mid/senior level — ekhane company dekhe tumi age **real kaj korecho kina** (paid experience, client handle, real finding). Shudhu course/cert diye senior hoy na. Zero theke realistic timeline: **3–5 bochor** (Part 1 er 18–24 mash + aro 18–36 mash). Bhalo khobor: ei experience Bangladesh er office e na giye **remote contract/freelance/platform** diyei banano jay.

Section	Ki ache
12. Advanced remote: bastobota	Senior remote role e company ki dekhe, kon role realistic
13. Roadmap extension	Phase 6–8 (Mash 24–60), output ar milestone
14. Specialization tracks	6 ta advanced lane — protiti te ki shikhba, kothay practice
15. Core advanced skills	Je skill shob track e lagbe (code, threat model, cloud, report)
16. Advanced cert map	OSWE/OSEP/BSCP/CRTO/AWS/CKS — kon ta kokhon
17. Remote-ready professional skill	Spoken English, async kaj, setup, payment, contract
18. Experience + remote job hunting	Freelance → platform → contract → full-time ladder
19. Interview & negotiation	Senior interview er format, rate/salary negotiation
20. Advanced remote checklist	Apply korar age ja ready thakte hobe

12. Advanced Remote: Bastobota

Remote job e tumi shara duniyar candidate er sathe compete korcho. Tai company er kache tomar **proof** ar **communication** local job er cheye onek beshi gurutto pay.

Senior remote role e company ja dekhe

Ki dekhe	Keno	Tumi kivabe dekhabe
2–5+ bochor relevant experience	Supervision chara kaj korte parbe kina	Freelance, PtaaS platform, contract — shob paid kaj count hoy
Deep specialization	Generalist senior kom hire hoy	Ekta lane e advanced cert + public research
Public reputation	Remote e tomake dekhte pay na — kaj dekhe	CVE, bounty leaderboard, blog, talk, open-source tool
Client-facing skill	Senior ra client call/debrief nije chalay	Nijer freelance client er case study
Fluent spoken English	Shob meeting, interview English e	Mock interview, recorded walkthrough video
Reliability	Time zone, internet, power — deadline miss hobe na	Backup setup, async update er abhyas

Realistic remote role (advanced)

Role	Kaj	Kar jonno bhalo
Senior Penetration Tester / Consultant	Web, API, network, cloud pentest + client report	Offensive lane, consultancy pochondo
Application Security Engineer	Code review, threat model, secure SDLC, dev team ke guide	**Developer background thakle best**
Cloud / DevSecOps Security Engineer	AWS/Azure/K8s hardening, IaC, CI/CD security	Demand + salary duitai high
Red Team Operator	Adversary simulation, AD/Entra, C2, OPSEC	Deep infra interest, lomba path
AI / LLM Security Engineer / Red Teamer	LLM app, agent, RAG system test o secure kora	Notun field — early mover advantage
Detection Engineer / Threat Hunter	Detection-as-code, SIEM/EDR rule, hunt	Blue team pochondo kore, stable
Smart Contract Auditor (Web3)	Solidity code audit, competitive audit	Fully remote, global, merit-based

Visa/citizenship filter: Onek US job e “US citizen / security clearance” lage — egula skip koro. Target koro “Remote — Worldwide”, “EMEA/APAC”, ba contractor hire kore emon company. EU/UK/Australia/Singapore er onek consultancy international contractor ney.

13. Roadmap Extension — Phase 6 to 8

Part 1 er Phase 0–5 er por. Phase 6 ar 7 overlap korbe — shikhte shikhte paid kaj shuru korbe.

Phase	Shomoy	Focus	Shesh e output
6. Deep Specialization	Mash 24–30	Ekta primary track (Section 14) + core advanced skill (Section 15)	1 ta advanced cert, 3–5 ta deep research post
7. Paid Remote Experience	Mash 24–42	Freelance, PtaaS platform, private bounty, remote contract	12–18 mash paid kaj, 3+ client testimonial
8. Senior Signal	Mash 36–60	Original research, CVE, talk, open-source, mentoring	Senior remote offer

> **Rule (Part 1 er motoi):** Protiti phase e public output. Advanced level e output mane shudhu lab writeup na — **original kaj**: notun bug class er research, nijer tool jeta onno manush use kore, real client er (anonymized) case study.

14. Specialization Tracks — Advanced Skill

Ekta primary + ekta secondary track bechhe nao. Shob gula korte gele kono tai senior level e jabe na. Tomar Part 1 er Phase 4 e je lane nisila, sheta continue korai shobcheye druto.

A. Advanced Web / API / AppSec

- Advanced web bug: HTTP request smuggling, web cache poisoning/deception, race condition, SSTI, insecure deserialization, prototype pollution.
- Auth deep-dive: OAuth 2.0/OIDC flow attack, SAML, JWT attack, SSO misconfig, MFA bypass logic.
- API: GraphQL (introspection, batching, authz), gRPC basics, mass assignment, BOLA/BFLA at scale.
- **Source code review** 2–3 language e (Java/Spring, Node/TypeScript, Python, PHP, Go) — source theke sink trace kora.
- Secure SDLC: threat modeling, SAST/DAST/SCA CI/CD te boshano (Semgrep, CodeQL), supply chain (SBOM, dependency confusion).
- **Practice:** PortSwigger er shob Expert lab, open-source app e CVE hunt, Semgrep/CodeQL custom rule likho. **Cert:** BSCP → OSWE.

B. Cloud Security / DevSecOps

- AWS deep: IAM policy evaluation, STS/role chaining, Organizations/SCP, CloudTrail, GuardDuty, S3/KMS misconfig. Tarpor Azure/Entra ID, GCP basics.
- Container + Kubernetes: Docker security, K8s RBAC, pod security, network policy, container escape concept, secrets management.
- IaC: Terraform likhte paro + Checkov/Trivy diye scan; GitHub Actions/CI pipeline attack o hardening.
- **Practice:** flaws.cloud, CloudGoat, Pwned Labs, Kubernetes Goat, nijer AWS free tier e misconfig lab. **Cert:** AWS Security Specialty, CKA → CKS.

C. Red Team / Advanced Infrastructure

- Active Directory deep: Kerberos delegation attack, ADCS abuse, NTLM relay, ACL abuse, trust attack.

- Hybrid identity: Entra ID (Azure AD) attack path, token abuse, conditional access gap.
- C2 framework (Sliver, Mythic) **nijer lab e**, OPSEC, EDR/detection kivabe kaj kore sheta bujha — shudhu authorized engagement e.
- **Practice:** GOAD (Game of Active Directory) lab, HTB Pro Labs. **Cert:** OSCP+ → CRTO → OSEP.

D. AI / LLM Security (advanced)

- ML basics: transformer, embedding, fine-tuning, RAG pipeline kivabe kaj kore — na bujhle deep test kora jay na.
- Agent/tool security: indirect prompt injection, tool/MCP permission abuse, excessive agency, data exfiltration via agent.
- Model supply chain: unsafe model file (pickle) loading, poisoned dataset, model/plugin dependency risk.
- LLM red teaming tool: garak, PyRIT, promptfoo; framework: OWASP LLM Top 10, MITRE ATLAS, NIST AI RMF, EU AI Act basic.
- **Practice:** nijer RAG/agent app banie attack + defend koro; AI/ML bug bounty program (e.g. huntr) e report.

E. Detection Engineering / Threat Hunting

- Detection-as-code: Sigma rule, KQL (Sentinel), SPL (Splunk), version control + testing.
- EDR/Sysmon telemetry, MITRE ATT&CK mapping, atomic test diye detection validate kora.
- Incident response + DFIR: memory forensics (Volatility), log analysis, timeline, malware analysis basic.
- **Practice:** nijer SIEM lab (Wazuh/ELK) + attack simulate kore detection likho, GitHub e publish. **Cert:** BTL2 ba SANS-level (budget thakle).

F. Smart Contract / Web3 Security (fully remote lane)

- Solidity, EVM basic, common bug: reentrancy, access control, oracle manipulation, rounding/precision, upgradeability bug.
- Tool: Foundry (test/PoC), Slither; DeFi protocol kivabe kaj kore (AMM, lending).
- **Earning:** Code4rena, Sherlock, Cantina er competitive audit — country/degree dekhe na, result dekhe. Leaderboard e uthle audit firm direct hire kore.

> **Tip:** A (AppSec) + B (Cloud) combination remote market e shobcheye beshi demand e. Tomar jodi web/WordPress dev background thake, A primary, B secondary nao.

15. Core Advanced Skills — shob track e lagbe

Skill	Junior level (Part 1)	Advanced level (ekhon lagbe)
Programming	Python script likhte paro	Production-quality tool (test, packaging, docs) Python + Go/Rust/C# er ekta; Java/JS/C porte paro
Threat modeling	OWASP Top 10 jano	Data flow diagram, STRIDE, attack tree — design review e risk dhorte paro
Risk communication	Bug er CVSS dite paro	CVSS v4 + **business impact** explain, CTO/CEO ke 5 minute e bujhate paro
Reporting	Sample report	Client-ready report, executive summary, retest, remediation roadmap

Skill	Junior level (Part 1)	Advanced level (ekhon lagbe)
Cloud	Basic idea	Kono ekta cloud (AWS) e hands-on, nijer track e apply korte paro
Automation + AI	AI ke tutor hisebe use	LLM API diye nijer security workflow automate (triage, recon, report draft) — kintu verify nije
Exploit basics	Public exploit chalate paro	Debugger (gdb/x64dbg), assembly porte paro, exploit modify korte paro (deep chaile OSED)
Compliance awareness	—	SOC 2, ISO 27001, PCI DSS, GDPR — client keno test korache seta bujho
Mentoring	—	Junior ke guide, review, documentation likha

16. Advanced Certification Map

Part 1 er eJPT/PNPT/OSCP er por. **Shob nite hobe na** — nijer track er 1–2 ta.

Cert	Track	Type	Keno / kokhon
OSCP+ (OffSec)	Pentest (all)	Practical, 24h	Remote HR filter er gold standard — Part 1 e na nile ekhon
BSCP (PortSwigger)	Web/AppSec	Practical web	Kom dam, web skill er strong proof
OSWE (OffSec)	Web/AppSec	White-box code review	Senior AppSec/web pentest er jonno top
OSEP (OffSec)	Red team	Practical, evasion + AD	Senior pentester/red team
CRTO (Zero-Point)	Red team	Practical C2/AD	Red team entry, OSEP er cheye shosta
OSED (OffSec)	Exploit dev	Practical	Optional — vuln research e jete chaile
AWS Security Specialty	Cloud	Multiple-choice	Cloud security role e HR filter
CKA → CKS (CNCF)	Cloud/K8s	Practical, hands-on	Kubernetes security role

> **Budget tip:** OffSec er Learn One (1 bochor subscription) e course + exam attempt thake — ek cert e focus korle shosta pore. Sale e kino. Dam ar exam format bodlay — kenar age official site e check koro.

17. Remote-ready Professional Skills

Bangladesh theke remote kaj korte gele technical skill er pashapashi egulo na thakle offer pabe na, ba pele o rakhte parbe na.

A. Spoken English — shobcheye boro gap

- Target: 30–45 minute technical interview fluently — nijer bug/project English e explain korte paro.
- Protidin 15–20 min: nijer kaj English e bole record koro (Loom/phone), shuno, abar koro.
- Shoptahe 1 ta mock interview (bondhu, online community, ba AI voice mode diye practice — kintu manusher sathe o koro).
- Nijer best 3 ta finding er 5-minute English walkthrough video banao — portfolio te o kaje lagbe.

B. Async kaj + documentation

- Clear written update (ki korecho, ki blocked, next step) — remote team e eta e tomar “presence”.
- Tool: Slack, Jira/Linear, Notion/Confluence, Git workflow (PR, review).
- US/EU er sathe din e 3–4 ghonta overlap rakhte paro emon routine plan koro.

C. Bangladesh-specific setup

Jinish	Keno	Ki korbe
Power backup	Load shedding e meeting/exam miss	IPS/UPS (router + laptop at least 3–4 ghonta)
Internet backup	Ek ISP down hole kaj bondho	2 ta ISP ba broadband + mobile data hotspot
Audio/video	Client tomake first impression e judge kore	Bhalo headset (noise cancel), webcam, quiet room
Payment channel	Taka aste dery/fee	Payoneer, bank wire (SWIFT) — bank er sathe age kotha bolo
Contract / EOR	Company BD te entity nei	Deel, Remote.com, Oyster er moto EOR/contractor platform diye hire hoy
Tax / legal	Foreign income er niyom	Freelance/service export income niye tax lawyer ba bank e advice nao

NDA ar data handling: Client er data, report, credential kokhono personal cloud/AI tool e upload koro na jodi contract allow na kore. Remote e trust e shob — ekbar data leak hole career shesh.

18. Experience Banano + Remote Job Hunting

Senior remote job er boro barrier “experience nei”. Nicher ladder diye remote theke-i experience banao:

Step	Ki	Kivabe dhukbe	Ki pabe
1	Freelance security kaj	Upwork, nijer network, WordPress audit/hardening, pentest for startup	Paid experience, testimonial
2	PtaaS / crowd pentest platform	Synack Red Team, Cobalt Core, HackerOne/Bugcrowd pentest — assessment pass kore join	Structured paid pentest, client report experience
3	Private bounty program	Public program e valid report → private invite	Kom competition, beshi reward, reputation
4	Remote contract (consultancy)	Boutique pentest firm (EU/UK/AU) contractor ney — LinkedIn e direct message	Real engagement, reference
5	Full-time remote mid → senior	Upore er shob proof niye apply	Stable senior role

Platform eligibility country onujayi bodlay — join korar age official site e Bangladesh allowed kina check koro.

Kothay job khujbe

- LinkedIn: filter **Remote** + location “Worldwide”/“EMEA”; security hiring manager/recruiter follow koro.
- Remote job board: Wellfound, We Work Remotely, Remote OK, infosec-specific job board; company career page directly.
- Target company: security consultancy, security product company, SaaS/fintech er security team, Web3 audit firm.
- Community: Discord/Slack security server, open-source project contributor hisebe — onek remote hire referral e hoy.

Senior-level reputation

- **Original research** blog: notun technique/bug class, tool er deep analysis — lab writeup er cheye onek beshi value.
- Conference: virtual BSides, OWASP chapter meetup, local BD event e talk — CFP submit koro.
- Open-source tool: real problem solve kore emon tool, GitHub e maintain koro (star + user = proof).
- Bounty/audit leaderboard rank — recruiter ra eta dekhe nijeo message kore.

19. Interview & Negotiation

Round	Ki hoy	Prep
Recruiter screen	Background, English, salary expectation, time zone	2-minute English self-intro ready rakho
Technical deep-dive	Nijer project/bug niye proshno, “keno, kivabe”	Nijer CV er protiti line deep e explain korte paro
Practical / take-home	Live hacking, code review, ba take-home pentest + report	**Report quality** e shobcheye beshi shomoy dao

Round	Ki hoy	Prep
Scenario / design	“Ei architecture threat model koro”, “notun app kivabe test korbe”	Threat modeling + methodology bole bole practice
Behavioral	Client conflict, deadline, mistake handle	STAR format e 5–6 ta real story ready

Negotiation

- Salary/rate research koro role + region onujayi (job post er range, salary survey, community) — Bangladesh er local rate diye nijeke value koro na.
- Contractor hole hourly/daily rate e equipment, tax, chuti, internet er khoroch dhore hisab koro.
- Prothom offer e “yes” na bole range jiggesh koro; written offer er age resign/commitment na.
- Payment schedule, currency, contract er termination clause, IP/NDA clause porhe tarpor sign.

20. Advanced Remote Checklist

Part 1 er Final Job-Ready Checklist complete howar por, eigulo ready thakle senior remote role e confidently apply koro:

#	Item	Done?
1	Ekta primary track e deep skill + 1 ta advanced cert (OSWE/OSEP/BSCP/CRTO/AWS Security/CKS)	☐
2	12–18+ mash paid security experience (freelance, PtaaS, contract — remote holeo count)	☐
3	3+ high/critical finding: CVE, bounty, private program, ba audit finding	☐
4	5+ original research/deep technical post (shudhu lab writeup na)	☐
5	1 ta open-source security tool jeta onno manush use kore	☐
6	1 ta talk/webinar/podcast (virtual BSides ba meetup cholbe)	☐
7	Client kickoff, debrief, executive summary nije handle korecho	☐
8	Threat modeling + secure design review korte paro	☐
9	SOC 2 / ISO 27001 / PCI DSS er basic context jano	☐
10	30–45 min technical interview English e comfortable (mock diye tested)	☐
11	Backup power + backup internet + professional audio/video + payment channel ready	☐
12	English portfolio site + LinkedIn + 2–3 ta reference (client/team lead)	☐

> **Mul kotha:** Advanced remote job = **deep skill + proven paid experience + public reputation + fluent communication**. Ei char ta-i lagbe. Part 1 skill dey, Part 2 sheta ke senior-level proof e convert kore.

Note: Cert price, platform eligibility, program reward ar job market bodlay — sob kichu official source e verify koro. Legal & ethics (Section 11) advanced level e aro beshi important — scope ar written authorization chara kono test na.
