CYBERSECURITY / ETHICAL HACKING

Learning Roadmap

Zero theke junior job, tarpor international remote e senior level — 15 ta module, ekta por ekta.

15	18–24	3–5	2–3
module	mash · junior job-ready	bochor · senior remote	ghonta · protidin

Module order

Upor theke niche, ekta shesh kore porer ta. Shomoy zero theke, din e 2–3 ghonta dhore.

PART A · JUNIOR JOB-READY (MODULE 1–11)

01	**Computer Basics**	Mash 1–3
02	**Networking**	Mash 4–5
03	**Linux + Windows**	Mash 5–6
04	**Programming — Python + Bash**	Mash 6–7
05	**Web Basics + Tools + Lab**	Mash 7
06	**Web Application Hacking**	Mash 8–10
07	**Network Pentest + Privilege Escalation**	Mash 10–11
08	**Report Writing + First Cert**	Mash 11–13
09	**AI + AI Security**	Mash 12–13
10	**Specialization + Real Bugs**	Mash 13–18
11	**Portfolio + Job Hunt**	Mash 16–24

PART B · ADVANCED REMOTE (MODULE 12–15)

12	**Deep Specialization + Advanced Cert**	Mash 24–30
13	**Senior-level Core Skills**	Mash 24–36
14	**Remote Work Skills**	Mash 24–36
15	**Paid Experience → Senior Remote Job**	Mash 24–60

3 ta rule shob module e:

1. Protiti module e **output** rakho — notes, writeup, GitHub. Shudhu video dekha shekha na.
2. **Consistency** — protidin 2 ghonta, weekend e 12 ghonta na.
3. **Permission chara** kono system e test kora illegal — shudhu nijer lab, practice site, ba written permission.

MODULE 1

Computer Basics

Mash 1–3 · Computer already jana thakle skip

Goal: Computer ke nijer haater moto chalano, ar online e nijeke safe rakha.

KI SHIKHBE

1.1 Hardware

- CPU, RAM, storage (HDD vs SSD), motherboard, GPU
- Port: USB, HDMI, LAN (Ethernet)
- RAM ar storage er parthokko
- Laptop spec pora (i5/Ryzen 5, 16 GB RAM, SSD)

1.2 Windows chalano

- Start menu, taskbar, Alt+Tab
- File Explorer: copy, cut, paste, rename, delete, Recycle Bin
- File extension (.exe .pdf .zip .txt) show kora
- Software install/uninstall — official site theke
- Windows Update, Settings
- Task Manager diye hang app bondho
- ZIP/RAR extract

1.3 Keyboard + typing

- Shortcut: Ctrl+C/V/X/Z/A/S/F
- Win+E, Win+D, Ctrl+Shift+Esc
- Touch typing (home row)
- Target: 30+ WPM, pore 40+

1.4 Internet + Google search

- Browser: tab, bookmark, download, incognito, extension
- Search operator: “quotes”, site:, filetype:, -word
- Error message copy kore search
- Forum/Stack Overflow theke answer khuja

1.5 Online safety

- Strong password + Bitwarden (password manager)
- 2FA (authenticator app)
- Phishing email/link chena — URL check
- Crack/fake software er risk
- bKash/Nagad OTP scam, fake job offer

1.6 Number system + logic

- Binary ↔ decimal conversion
- Hexadecimal
- Bit, byte, KB/MB/GB
- AND, OR, NOT, XOR

1.7 Command line (Windows)

- CMD vs PowerShell
- cd, dir, mkdir, del, copy
- ipconfig, ping, tracert
- Absolute vs relative path

1.8 Virtual machine

- Virtualization ki
- VirtualBox install
- Ubuntu ISO diye VM banano
- Snapshot nea
- NAT vs Bridged network (basic)

1.9 Technical English + shekhar abhyas

- Subtitle soho English tech video
- Din e 5 ta notun technical word
- Documentation pora
- AI ke tutor hisebe use
- Notes rakha (Notion/Obsidian)

KOTHAY PRACTICE

keybr.com, typing.com, GCFGlobal Computer Basics, Professor Messer (CompTIA A+), TryHackMe Pre-Security

MODULE SHESH E TUMI PARBE

- ☐ Kono help chara software install, file organize korte
- ☐ Error Google kore nije solve korte
- ☐ VirtualBox e Ubuntu chalate
- ☐ Subtitle soho English tech video bujhte

MODULE
2

Networking

Mash 4–5

Goal: Internet e data kivabe jay sheta bujha — hacking er bhit eta.

KI SHIKHBE

2.1 Network basics

- LAN, WAN, Internet
- Router, switch, modem, access point
- Client-server model
- Bandwidth vs latency

2.2 OSI + TCP/IP model

- OSI er 7 layer er naam ar kaj
- TCP/IP er 4 layer
- Kon protocol kon layer e
- Encapsulation: data → segment → packet → frame

2.3 IP addressing + subnetting

- IPv4 structure
- Public vs private IP (10.x, 172.16–31.x, 192.168.x)
- Subnet mask + CIDR (/24, /16)
- Network, broadcast, host range calculate
- NAT
- IPv6 basic

2.4 MAC + ARP

- MAC address ki
- ARP kivabe kaj kore
- ARP spoofing concept

2.5 TCP vs UDP

- Connection-oriented vs connectionless
- 3-way handshake: SYN → SYN-ACK → ACK
- TCP flags: SYN, ACK, FIN, RST, PSH
- Port ki, well-known port (0–1023)

2.6 Core protocols

- DNS: A, AAAA, CNAME, MX, TXT, NS record
- DNS resolution flow
- DHCP (DORA process)
- HTTP / HTTPS
- FTP, SSH, Telnet, SMTP, SMB, RDP
- ICMP (ping, traceroute)

2.7 Common ports (mukhosto)

- 21 FTP, 22 SSH, 23 Telnet
- 25 SMTP, 53 DNS, 80 HTTP
- 110 POP3, 143 IMAP, 443 HTTPS
- 139/445 SMB
- 3306 MySQL, 3389 RDP
- 8080 (alt HTTP)

2.8 Encryption + TLS basics

- Symmetric vs asymmetric encryption
- Hashing (MD5, SHA-256) vs encryption
- Certificate + CA
- HTTPS/TLS handshake (basic)

2.9 Network security devices

- Firewall (port allow/block)
- VPN, proxy
- IDS vs IPS

2.10 Wireshark

- Packet capture
- Filter: http, ip.addr==, tcp.port==
- Follow TCP stream
- Handshake ar DNS query dekha

KOTHAY PRACTICE

TryHackMe Pre-Security (Network Fundamentals), Professor Messer Network+ (free video), Wireshark nije capture kore

MODULE SHESH E TUMI PARBE

- [ ] Browser e URL dile ki ki hoy step by step bujhate
- [ ] Subnet calculate korte
- [ ] Common port mukhe bolte
- [ ] Wireshark e HTTP request ar handshake khuje ber korte

MODULE
3

Linux + Windows

Mash 5–6

Goal: Linux terminal comfortably chalano ar Windows/Active Directory er security basic bujha.

KI SHIKHBE

3.1 Linux basics

- Distro: Ubuntu, Kali
- File system: /, /home, /etc, /var, /tmp, /bin, /usr
- Navigation: pwd, ls -la, cd, find, locate
- File: touch, cp, mv, rm, mkdir, cat, less, head, tail
- Editor: nano, vim basic

3.2 Users + permissions

- User, group, /etc/passwd, /etc/shadow
- rwx, chmod (755, 644), chown
- sudo, su
- SUID/SGID bit — keno dangerous

3.3 Process + services

- ps, top/htop, kill
- systemctl start/stop/status
- Cron job (crontab)
- Environment variable, PATH

3.4 Text processing

- grep (basic regex)
- awk, sed, cut
- sort, uniq, wc
- Pipe |, redirect > >>
- Log file pora (/var/log)

3.5 Linux networking

- ip a, ss / netstat
- ping, curl, wget
- ssh, scp, ssh key
- /etc/hosts

3.6 Package + archive

- apt install / update / remove
- tar, gzip, zip
- git clone

3.7 Windows for security

- PowerShell: Get-Process, Get-Service, Get-ChildItem
- Administrator vs normal user
- Services, registry (HKLM, HKCU)
- Event Viewer (log)
- Defender, Windows Firewall

3.8 Active Directory basics

- Domain, Domain Controller
- User, group, OU
- Group Policy
- Kerberos ar NTLM (concept)
- LDAP

KOTHAY PRACTICE

OverTheWire Bandit, TryHackMe Linux Fundamentals + Windows Fundamentals, nijer Ubuntu VM

MODULE SHESH E TUMI PARBE

- ☐ Terminal diye file khuje, permission bodlate
- ☐ Bandit er level 0–20 solve korte
- ☐ AD ki, domain kivabe kaj kore bujhate

MODULE
4

Programming — Python + Bash

Mash 6–7

Goal: Nijer kaj automate korar moto code likhte para, ar onner code porte para.

KI SHIKHBE

4.1 Python fundamentals

- Data type: str, int, list, dict, tuple, set
- if/else, for/while loop
- Function, argument, return
- Error handling (try/except)
- File read/write

4.2 Python intermediate

- Module + pip, virtualenv
- List/dict comprehension
- String: split, join, format, encode/decode
- JSON parse
- argparse (command-line argument)

4.3 Python for security

- requests: GET/POST, headers, cookies, session
- socket: TCP client, port scanner
- subprocess (OS command)
- re (regex) diye data extract
- base64, hashlib

4.4 Bash scripting

- Shebang, variable, if, loop
- Command output use: $(...)
- Choto automation (recon, backup script)

4.5 Git + GitHub

- init, add, commit, push
- Branch
- README likha
- Nijer code GitHub e publish

4.6 Code porte shikha (pore lagbe)

- JavaScript basic: DOM, fetch
- PHP basic: form, $_GET / $_POST
- SQL: SELECT, WHERE, JOIN, INSERT

KOTHAY PRACTICE

Python for Everybody, CS50P (free), nijer choto tool banano

MODULE SHESH E TUMI PARBE

- ☐ Ekta website e request pathanor script likhte
- ☐ Ekta simple port scanner likhte
- ☐ Code GitHub e rakhte

MODULE
5

Web Basics + Tools + Lab

Mash 7

Goal: Website kivabe kaj kore bujha, tool chalano, ar nijer hacking lab banano.

KI SHIKHBE

5.1 Web kivabe kaj kore

- DNS → TCP → TLS → HTTP flow
- HTML, CSS, JavaScript er role
- Frontend vs backend vs database
- Web server: Apache, Nginx

5.2 HTTP in detail

- Method: GET, POST, PUT, DELETE, OPTIONS
- Status code: 200, 301/302, 401, 403, 404, 500
- Header: Host, Cookie, User-Agent, Content-Type, Authorization
- Query string vs request body

5.3 State + authentication

- Cookie flag: HttpOnly, Secure, SameSite
- Session ki
- JWT structure: header.payload.signature
- OAuth idea

5.4 Browser security

- Same-origin policy
- CORS
- Content Security Policy (CSP)
- Encoding: URL, HTML, base64

5.5 API

- REST API structure
- JSON
- API key, token
- GraphQL basic idea

5.6 Burp Suite

- Proxy setup + CA certificate
- Intercept + request modify
- Repeater
- Intruder (basic)
- Decoder, Comparer

5.7 Onnanno tool

- Browser DevTools: Network, Storage, Console
- curl
- Nmap basic scan (-sV, -p-)

5.8 Home lab

- VirtualBox / VMware
- Kali Linux
- Metasploitable 2, DVWA, OWASP Juice Shop
- Host-only / NAT network setup
- Snapshot

KOTHAY PRACTICE

TryHackMe Cyber Security 101 path, PortSwigger Academy (shuru), nijer lab

MODULE SHESH E TUMI PARBE

- ☐ Burp diye request dhore modify korte
- ☐ Nmap diye scan korte
- ☐ Nijer lab chalu kore README/blog likhte

MODULE
6

Web Application Hacking

Mash 8–10 · shobcheye important module

Goal: Real website er common bug khuje exploit korte para, ar fix explain korte para.

KI SHIKHBE

6.1 Web recon

- Subdomain enumeration (subfinder, amass)
- Directory brute force (ffuf, gobuster)
- Tech fingerprint (Wappalyzer, whatweb)
- JS file theke endpoint khuja
- Wayback URLs

6.2 SQL Injection

- In-band: UNION, error-based
- Blind: boolean, time-based
- Login bypass
- Database enumeration
- sqlmap
- Fix: prepared statement

6.3 XSS

- Reflected, stored, DOM-based
- Session hijack concept
- Filter bypass basic
- CSP
- Fix: output encoding

6.4 Access control + IDOR

- Horizontal vs vertical privilege escalation
- IDOR: id bodle onner data
- Missing function-level access control
- Parameter tampering

6.5 Authentication bugs

- Brute force + rate limit
- Password reset flaw (token, host header)
- 2FA bypass
- Username enumeration
- Session fixation, logout issue

6.6 CSRF + SSRF

- CSRF token, SameSite cookie
- SSRF: internal service access
- Cloud metadata (169.254.169.254)
- Open redirect

6.7 File-related bugs

- File upload bypass: extension, MIME, magic bytes
- Path traversal (../)
- LFI / RFI
- Web shell concept

6.8 Aro injection

- OS command injection
- SSTI (server-side template injection) basic
- XXE

6.9 Business logic

- Price/quantity manipulation
- Workflow step skip
- Race condition basic
- Coupon/limit abuse

6.10 API security

- OWASP API Top 10
- BOLA / BFLA
- Mass assignment
- JWT attack (none alg, weak secret)
- Rate limiting

KOTHAY PRACTICE

PortSwigger Web Security Academy (free, best) — target 100+ lab; OWASP Juice Shop

MODULE SHESH E TUMI PARBE

- ☐ OWASP Top 10 er protiti ta exploit + fix explain korte
- ☐ 100+ PortSwigger lab complete
- ☐ Protiti lab er notes

MODULE 7

Network Pentest + Privilege Escalation

Mash 10–11

Goal: Ekta machine e dhuke full control neoa porjonto puro process.

KI SHIKHBE

7.1 Pentest methodology

- Recon → scanning → enumeration → exploitation → privesc → post-exploitation → report
- Scope + rules of engagement

7.2 Scanning + enumeration

- Nmap: -sS, -sV, -sC, -p-, -A, -oN
- SMB: smbclient, enum4linux
- FTP, SSH, HTTP, SNMP enumeration
- Banner grabbing

7.3 Exploitation

- Public exploit khuja: searchsploit, Exploit-DB
- CVE pore exploit modify
- Metasploit: search, use, set, run
- Reverse shell vs bind shell
- netcat

7.4 Password attacks

- Hash type identify
- John the Ripper, Hashcat
- Hydra (online brute force)
- Wordlist (rockyou)
- Password spraying concept

7.5 Linux privesc

- sudo -l misconfig
- SUID binary (GTFOBins)
- Cron job abuse
- Writable file / PATH abuse
- Kernel exploit (shesh upay)
- LinPEAS

7.6 Windows privesc

- Service misconfig (unquoted path, weak permission)
- Stored credential
- AlwaysInstallElevated
- Token privilege (SeImpersonate)
- WinPEAS

7.7 Active Directory attack intro

- AD enumeration (BloodHound, ldapsearch)
- Kerberoasting
- AS-REP roasting
- Pass-the-hash concept

7.8 Post-exploitation

- File transfer: python http.server, certutil, wget
- Pivoting concept
- Cleanup

KOTHAY PRACTICE

TryHackMe Jr Penetration Tester path, HackTheBox Starting Point + Easy machine

MODULE SHESH E TUMI PARBE

- ☐ 20–30 ta THM/HTB machine solve
- ☐ Linux + Windows dui tatei privesc korte
- ☐ Protiti machine er notes (Obsidian/Notion)

MODULE

8

Report Writing + First Cert

Mash 11–13

Goal: Kaj ke professional bhabe dekhano, ar prothom hands-on certificate.

KI SHIKHBE

8.1 Pentest report structure

- Executive summary (non-technical)
- Scope + methodology
- Finding: title, severity, description, impact
- Steps to reproduce + PoC screenshot
- Remediation (fix)
- Appendix

8.2 Severity rating

- CVSS v3.1 / v4 calculator
- Risk = likelihood × impact
- Business impact explain kora

8.3 Writeup + blog

- Retired machine writeup structure
- Screenshot, code block
- Platform: GitHub Pages, Medium, Hashnode

8.4 Notes system

- Obsidian / Notion
- Nijer cheat sheet: command, payload

8.5 eJPT exam prep

- INE course
- Exam format: practical lab + question
- Practice: THM + HTB easy machine

KOTHAY PRACTICE

Nijer lab (DVWA) er upor full report banao; INE eJPT

MODULE SHESH E TUMI PARBE

- ☐ 1 ta professional sample report
- ☐ 3–5 ta public writeup
- ☐ eJPT pass

MODULE
9

AI + AI Security

Mash 12–13

Goal: AI ke tool hisebe use kora, ar AI system er bug khuja.

KI SHIKHBE

9.1 AI as a tool

- Bhalo prompt likha (context, example)
- Recon output / log summarize
- Script + payload druto likha — verify
- Code review e AI
- Report draft — accuracy nije check
- Limitation: hallucination

9.2 LLM basics

- Token, context window
- System prompt vs user prompt
- RAG ki
- AI agent + tool use ki

9.3 OWASP Top 10 for LLM

- Prompt injection
- Sensitive info disclosure
- Insecure output handling
- Excessive agency
- Supply chain risk

9.4 Prompt injection practice

- Direct vs indirect injection
- Jailbreak technique (role-play, encoding)
- LLM diye data exfiltration
- Agent/tool abuse

KOTHAY PRACTICE

Gandalf (Lakera), PortSwigger LLM attack labs, nijer choto chatbot banie test

MODULE SHESH E TUMI PARBE

- ☐ Prompt injection ki, kivabe hoy explain korte
- ☐ AI diye kaj korleo manually explain korte

MODULE
10

Specialization + Real Bugs

Mash 13–18

Goal: Ekta lane bechhe nao ar real-world e bug khujo.

KI SHIKHBE

10.1 Ekta lane bechho

- Web AppSec (code review)
- WordPress security
- Cloud (AWS)
- AI security
- SOC / blue team

10.2 Bug bounty basics

- Platform: HackerOne, Bugcrowd, Intigriti, YesWeHack
- Program policy, scope, out-of-scope pora
- Recon workflow
- Duplicate, N/A, triaged ki

10.3 Bug report likha

- Title, summary, steps, PoC, impact
- Video PoC
- Triager er sathe communication

10.4 WordPress lane (option)

- Plugin structure
- current_user_can, nonce, AJAX/REST handler
- $wpdb->prepare, esc_html
- Wordfence, Patchstack bounty

10.5 Code review lane (option)

- Source → sink concept
- Semgrep rule likha
- Open-source project audit
- CVE request process

10.6 SOC / blue team lane (option)

- SIEM: Splunk / ELK
- Windows Event ID, Sysmon log
- Alert triage
- Sigma rule
- LetsDefend

10.7 Legal + ethics

- Written permission chara test na
- Scope er baire na
- Responsible disclosure
- Real user data download na
- DoS / destructive test na

KOTHAY PRACTICE

Bug bounty platform, Wordfence/Patchstack, open-source code audit, LetsDefend (blue team)

MODULE SHESH E TUMI PARBE

- ☐ 1–3 ta real finding (valid bounty / CVE / disclosure)
- ☐ Nijer lane er 1–2 ta GitHub tool/script

MODULE
11

Portfolio + Job Hunt

Mash 16–24

Goal: Prothom job/client paoa.

KI SHIKHBE

11.1 GitHub portfolio

- 2–3 ta tool/script
- Bhalo README
- Pinned repo

11.2 Blog

- 5+ writeup
- 1 ta nijer research post

11.3 Resume

- 1 page
- Summary → Skills → Projects & Findings → Certs → Experience → Links
- ATS-friendly keyword

11.4 LinkedIn

- Headline, About, Featured (writeup, report)
- Weekly learning post
- Security lead/recruiter er sathe connect

11.5 Interview prep

- OWASP Top 10 explain
- Scenario: "login page kivabe test korbe?"
- Nijer finding walk-through
- Networking/Linux basic question
- Take-home test

11.6 Job search

- LinkedIn, company career page
- Upwork (WordPress security audit)
- Cold message template
- Referral

11.7 Next cert (optional)

- OSCP ba PNPT — remote job e helpful

KOTHAY PRACTICE

LinkedIn, company career page, Upwork, BD cybersecurity community

MODULE SHESH E TUMI PARBE

- ☐ Updated resume + LinkedIn + portfolio link
- ☐ 70% ready holei apply shuru

MODULE
12

Deep Specialization + Advanced Cert

Mash 24–30 · Advanced remote shuru

Goal: Ekta primary + ekta secondary track e senior level er gobhir skill. Remote e shera combo: Web AppSec + Cloud.

KI SHIKHBE

12.1 Advanced Web / AppSec

- HTTP request smuggling
- Web cache poisoning / deception
- Race condition
- SSTI, deserialization, prototype pollution
- OAuth/OIDC, SAML, JWT attack
- GraphQL
- Source code review: Java, Node, Python, PHP
- Cert: BSCP → OSWE

12.2 Cloud / DevSecOps

- AWS IAM: policy, role, STS, assume role
- S3, EC2, Lambda misconfig
- CloudTrail, GuardDuty
- Docker + Kubernetes (RBAC, pod security)
- Terraform + Checkov/Trivy
- GitHub Actions security
- Cert: AWS Security Specialty, CKA → CKS

12.3 Red Team

- AD deep: delegation, ADCS, NTLM relay, ACL abuse
- Entra ID (Azure AD) attack
- C2 (Sliver, Mythic) — nijer lab e
- OPSEC
- Cert: CRTO → OSEP

12.4 AI / LLM Security

- Agent/tool abuse, MCP
- RAG poisoning
- Model supply chain (unsafe pickle)
- garak, PyRIT, promptfoo
- MITRE ATLAS, NIST AI RMF

12.5 Detection Engineering

- Sigma, KQL, SPL
- Sysmon, EDR telemetry
- MITRE ATT&CK mapping
- Incident response, Volatility
- Cert: BTL2

12.6 Smart Contract (Web3)

- Solidity, EVM
- Reentrancy, access control, oracle manipulation
- Foundry, Slither
- Code4rena, Sherlock competitive audit

KOTHAY PRACTICE

PortSwigger Expert labs, flaws.cloud, CloudGoat, Pwned Labs, GOAD lab, HTB Pro Labs

MODULE SHESH E TUMI PARBE

- ☐ Ekta track e advanced cert
- ☐ 3–5 ta deep research blog post

MODULE
13

Senior-level Core Skills

Mash 24–36

Goal: Junior theke senior er parthokko: design bujha, risk bujhano, team ke guide kora.

KI SHIKHBE

13.1 Secure code review

- Source → sink trace
- 2–3 language e common vuln pattern
- Semgrep / CodeQL custom rule

13.2 Threat modeling

- Data flow diagram
- Trust boundary
- STRIDE
- Attack tree
- Design review

13.3 Risk communication

- CVSS v4
- Business impact bujhano
- Executive summary
- Client debrief call

13.4 Secure SDLC / DevSecOps

- SAST, DAST, SCA pipeline e
- Supply chain + SBOM
- Secret scanning

13.5 Compliance basics

- SOC 2
- ISO 27001
- PCI DSS
- GDPR — client keno test korache

13.6 Automation + engineering

- LLM API diye triage/recon/report automation
- Production-quality tool (test, docs)
- Go ba Rust ekta language

13.7 Mentoring

- Junior er kaj review
- Documentation
- Nijer methodology likha

KOTHAY PRACTICE

Open-source project e code review, nijer project er threat model likho, ekta automation tool banao

MODULE SHESH E TUMI PARBE

- ☐ Ekta app er threat model banate
- ☐ Non-technical manush ke bug er impact bujhate

MODULE
14

Remote Work Skills

Mash 24–36 · Module 12–13 er sathe

Goal: International team/client er sathe kaj korar moto ready howa.

KI SHIKHBE

14.1 Spoken English

- 2 minute self-intro
- Bug/architecture English e explain
- Mock interview
- Record → shuno → abar

14.2 Written communication

- Async update format: done / blocked / next
- Professional email
- Documentation

14.3 Remote tools

- Slack
- Jira / Linear
- Notion / Confluence
- Git PR workflow
- Zoom / Meet

14.4 Time management

- US/EU er sathe 3–4 ghonta overlap
- Deadline
- Weekly report

14.5 Setup (Bangladesh)

- IPS/UPS
- 2 ta internet connection
- Headset + webcam
- Quiet room

14.6 Payment + contract

- Payoneer, bank wire (SWIFT)
- EOR: Deel, Remote.com, Oyster
- NDA, contract clause pora
- Invoice
- Tax advice

KOTHAY PRACTICE

Shoptahe 1 ta mock interview, nijer best finding er 5-min English video

MODULE SHESH E TUMI PARBE

- ☐ English e confidently interview dite
- ☐ Load shedding/internet down holeo kaj chalate

MODULE
15

Paid Experience → Senior Remote Job

Mash 24–60

Goal: Remote theke-i experience banano ar senior role paoa.

KI SHIKHBE

15.1 Freelance

- Upwork profile
- Service: WP audit, startup pentest, hardening
- Pricing
- Client case study

15.2 Pentest platform

- Synack Red Team
- Cobalt Core
- HackerOne pentest
- Bangladesh allowed kina check

15.3 Advanced bug bounty

- Private program invite
- Recon automation
- Leaderboard rank

15.4 Remote contract

- EU/UK/AU boutique pentest firm
- LinkedIn outreach
- Contractor rate

15.5 Reputation

- Original research blog
- CVE
- Open-source tool
- Talk: virtual BSides, OWASP chapter

15.6 Remote job search

- “Remote — Worldwide / EMEA / APAC” filter
- US citizen/clearance job skip
- Wellfound, We Work Remotely, Remote OK

15.7 Interview + negotiation

- Recruiter screen, technical deep-dive
- Take-home test + report
- Scenario / threat model round
- Behavioral (STAR format)
- Salary research, contractor rate
- Offer/contract pore sign

KOTHAY PRACTICE

LinkedIn (Remote + Worldwide filter), Wellfound, We Work Remotely, Remote OK

MODULE SHESH E TUMI PARBE

- ☐ 12–18+ mash paid security experience
- ☐ 3+ high/critical finding
- ☐ Senior remote offer
